

HIT-Kody Kreskowe

— we identify your success

Who we are...

HIT-Kody Kreskowe offers **comprehensive IT solutions streamlining logistical, storage and production processes**. We specialize in provision of equipment and solutions for **automatic identification of information** on the basis of barcode, 2D code, RFID and VOICE technologies. We offer a full range of services, from consultancy, through selection and supply of high quality equipment, software implementation, measurement and installation of radio networks, to training, as well as integration of our solutions with the customers systems and devices plus the after-sales service. HIT-Kody Kreskowe benefits from its **long-standing experience in the field, now in excess of 15 years**. What sets us apart from the competition is the **high-class and substantive expertise of our staff, excellent knowledge of the industry and an extensive network of cooperative links with reputable Partners and Suppliers**.

We offer equipment for automatic identification

In the equipment category HIT-Kody Kreskowe is a Partner of well recognized and reputable producers: **LXE, Motorola, NORDIC ID, Datalogic, Pepperl Fuchs, Toshiba, CAB, Zebra, CISCO, WINCOMM, Feig Electronic, Axicon, REA and LVS**. We advise you on selection of technical solutions, taking into consideration your expectations and our own experience. Within our range you will discover equipment for both office (universal) use and application in challenging production conditions. We offer portable and vehicle-mounted terminals with barcode readers, in-counter scanners, portable and industrial barcode printers, industrial panel computers and barcode verifiers. HIT-Kody Kreskowe is a **firm open to innovations**, which is why we invest boldly in the most modern solutions: **Radio Frequency Identification (RFID)** and **VOICE technologies**. You are also able to find both short- and long-range RFID antennas and readers by FEIG Electronic as well as the voice terminals by LXE.

We supply functional specialist software

HIT-Kody Kreskowe also means professional software for logistics, storage and production applications. It is possible within our range to discover large **IT systems of the WMS and MES classes for logistics and production** as well as smaller solutions influencing the streamlining of warehouse operation. The following may be singled out in particular:

- **RedPrairieWMS and HIT-Warehouse WMS** – IT solutions dedicated to logistics and storage;
- **HYDRA** – a software system used in managing and tracking the production process;
- **HIT-Stocktaker Inventory Software** – software for registering and stocktaking fixed assets, which offers the additional option of utilization in warehouse and outlet stocktaking with application of barcodes and devices for their reading and printing;
- **CODESOFT SENTINEL PRINT PACK** – (Label View, Matrix and Archive) – a suite of products by Teklynx for designing and printing labels and print management;
- many other smaller applications, including applications for both heavy and light industry as well as small and medium-sized warehouses and applications prepared at the request of the customer.

HIT-Kody Kreskowe

— we identify your success

We are experts in label printing...

Our firm also possesses its own label production capability, comprising **modern printing machinery**. We cooperate with reputable suppliers of specialized materials, designed for production of labels, tags and RFID chips. We offer our customers **8-colour flexographic printing of labels – including multilayered** – on thermal and thermal transfer paper, along with PP, PE, PET as well as PVC labels and both cardboard and plastic tags.

... and a proven supplier of specialist markings

Our range in this category is considerably wider, however, as we offer warehouse markings, security tags and radio tagging using RFID chips. At our disposal we have the extensive competences in **specialist marking**, encompassing the food, chemicals, smelting, textile and gardening trades. We also offer labels, tags and markers resistant to mechanical detriments, chemical substances, atmospheric conditions and temperatures ranging from -60 up to +580°C. In the heavy industry we undertake projects linked with the **durable direct marking of products**, on the basis of solutions provided by RONMAS.

We care about the high quality of our after-sales service

Products purchased from our firm are covered by the after-sales service provided through our own experienced and highly-qualified device service department. We strive to maintain **service provision of the highest quality**, which is why we invest constantly the specialist training.

The professionalism and high quality of the services we provide are reflected in us being awarded the partnership and ISO 9001:2000 certification as well as the accolades of Transparent Firm and Business Gazelle.
